Windows Patch Assurance Report

Prepared for: Client Company

Prepared by: YourIT Company

YourIT!
Your Logo Goes Here

Table of Contents

1 - Summary

The Windows Patch Assurance Report helps verify the effectiveness of the client's patch management program. The report uses scan data to detail which patches are missing on the network. The Summary section provides a high-level overview of missing security updates and service packs across the entire network. After the Summary, you can find more detailed missing patch information for each individual workstation. Use this information to apply critical patches to reduce the overall security risk to the network.
