# Cybersecurity Maturity Model Certification (CMMC 2.0)

Prepare for, and maintain compliance with the cybersecurity requirements of the Department of Defense (DoD), as a part of your overall IT security assurance programs.

Perform a Rapid Baseline Assessment

Compliance Manager GRC gives you the option of using the Built-in CMMC 2.0 management templates to quickly assess how close you are to certification readiness for Level 1 or 2, and highlight the gaps.

Calculate Your SP 800-171 Risk Score

Compliance Manager GRC includes an interactive score sheet that uses the Department of Defense's specific methodology for determining the standardized score you must submit as part of the Interim Rule.

Automatically Generate Your SSP and POA&M

As you undergo the full assessment process for each individual control at each CMMC Level, you can systematically (and in some cases, automatically) upload your supporting documentation to speed up the audit process. Compliance Manager GRC generates the required System Security Plan (SSP) and Plan of Action & Milestones (POA&M).

Produce Required Evidence of Compliance

Compliance Manager GRC for CMMC automatically gathers data from your computers, LAN and the Microsoft Cloud which is needed as part of your evidence of compliance. As you work through the various CMMC requirements, you will have the ability to upload any supporting documents. These documents will be stored and accessible to any auditor or third-party assessor to speed the process.

STAY AHEAD OF THE CHANGING RULES

With the nation's security on high alert, the DoD is cracking down on all contractors to be sure they don't represent a security risk. Compliance Manager GRC is the best way to stay on top of the changing rules and ensure the requirements are being met.

MANAGE ALL YOUR IT REQUIREMENTS

If you need to manage the IT requirements of CMMC, it's likely you have requirements from other government or industry standards, contracts, or insurance policies that you also must comply with. Compliance Manager GRC is a unified security assurance platform that allows you to manage it all in the same portal, at the same time.

MANAGE END USER & VENDOR RISK

Compliance Manager GRC includes a"self-serve" portal you can brand and set up for end-users and/or employees to deliver basic Security Awareness Training. Have them read and agree to any of your policies. It also includes a separate vendor risk management portal where you can track your vendors' compliance with your standards.

Request a Demo today and discover the advantages of Compliance Manager GRC — the purpose-built compliance process automation platform for MSPs and IT professionals. For more information visit **www.cmgrc.com.**
