

# New Solution: Compliance Assurance for Cyber Liability Insurance

Meet the growing need for Cyber  
Insurance policy compliance & reporting

As the **cost of cybercrime rises to \$5 trillion**, more organizations are protecting their investments with cyber liability insurance.<sup>1</sup> This growing insurance market niche is expected to swell to \$10 billion within a year.<sup>2</sup>

## The Catch

Many cyber liability **claims are being denied** because policyholders can't prove they've met the terms of their policies. To assure payouts, **companies need compliance management and reporting** that meet their cyber insurance policy terms. That's where Compliance Manager GRC comes into play.

## Assuring Payouts

Depending on the policy limits, cyber liability claims can be quite high. Without a payout from your insurer, you may not be able to recover from a data breach. Implementing an integrated IT security assurance and compliance program for your organization will meet the requirements of any insurance provider and reduce your risk.

## Meet Compliance Manager GRC

Compliance Manager GRC allows you to track compliance with the IT terms of any insurance policy at the same time you manage compliance with your other IT requirements...from ANY source. With it you can:

- Identify all insurer security policy terms
- Establish network IT security configurations that are compliant with policy terms
- Run regular compliance audits
- Address compliance issues as they arise
- Automatically document everything
- Bind new primary or secondary cyber insurance

Compliance Manager GRC goes way beyond just cyber risk policy management. The platform allows you to assess, remediate, and provide evidence of compliance with all of your IT requirements...regardless of source.
